

The Hours Saved Report - Juniper Lane Physio

Week of July 6–12, 2026 · Custom system: insurance benefit checks · Sample report, fictional demo clinic. The task your team used to do by hand, done by a system - this page is what it did this week.

SAVED

The work it did

WHEN	WORK COMPLETED	VOLUME	OUTCOME
Mon 6:10a	Benefit checks for Tuesday's full schedule	13 patients	DONE - list on the desk before open
Tue 6:05a	Benefit checks for Wednesday's schedule	11 patients	DONE 1 FLAGGED - coverage exhausted, desk rebooked with extended benefits
Wed 6:15a	Benefit checks for Thursday's schedule	12 patients	DONE
Wed 2:30p	Re-check: two same-day add-on appointments	2 patients	DONE - 40 minutes before arrival
Thu 6:08a	Benefit checks for Friday's schedule	10 patients	DONE 1 FLAGGED - policy changed insurers, desk confirmed new details at check-in
Fri 6:12a	Benefit checks for Saturday + Monday	10 patients	DONE 1 FLAGGED - dependent aged out of plan, patient told before arrival
Fri 4:45p	Weekly summary logged for billing	58 checks	FILED - every check on record with a timestamp

The math: 58 checks at ~15 minutes each by hand = **14.5 staff hours** returned this week - roughly **63 hours a month**, a full week and a half of front-desk time. At \$29/hour fully loaded, that is about **\$420/week** in wages doing robot work. **And the part wages can't measure:** 3 patients would have arrived with coverage surprises. All 3 were caught before they walked in.

Worth knowing

Every check finished before 7am - the list was waiting when your desk unlocked the door. The system works while nobody is watching.

The Thursday flag - a patient whose **policy changed insurers mid-treatment** - is the kind that used to become a billing dispute two weeks later. It was a sticky note at check-in instead.

Zero checks missed in week 1. If a week ever comes back with gaps, this page will say so - **that is the deal.**

YOUR TASK

This is a sample - yours gets built from the task you show us once, like training a new hire, and scoping is a free 15-minute call. Tell Joy what eats your week: **778-658-6587** (she is our AI receptionist - the call is the demo) or book at juiceautomation.com/book.
